

SONALI VARSHNEY

Aligarh, Uttar Pradesh

+91 7533828772 | sonalivarshney1404@gmail.com | linkedin.com/in/sonali-varshney | Github.com/SonaliV14

PROFESSIONAL SUMMARY

MCA student with experience in full-stack development, backend engineering, and AI-powered applications. Skilled in building scalable applications using React, Node.js, PostgreSQL, Python, Java, and modern software engineering practices, with knowledge of secure coding principles and backend system design. Passionate about automation, cloud technologies, problem-solving, scalable infrastructure systems, and team collaboration in fast-paced engineering environments.

EDUCATION

MASTERS OF COMPUTER APPLICATIONS

Aligarh Muslim University

Aug 2024 – June 2026

Current CGPA: 8.5

B.Sc. (COMPUTER APPLICATIONS)

Aligarh Muslim University

Dec 2021 – May 2024

CGPA: 7.61

EXPERIENCE

SALESFORCE DEVELOPER INTERN | Infoglen LLC.

Jan 2026 – Current

- Automated CRM workflows using Apex and Salesforce Flows, reducing manual processing effort by ~30%
- Developed reusable Lightning Web Components (LWC), enhancing UI scalability, maintainability, and user interaction efficiency
- Processed large datasets using Async Apex (Batch & Queueable), handling 5K+ records with improved throughput and reliability
- Optimized SOQL queries, test coverage, and debug logs, enhancing deployment reliability and code quality
- Collaborated with cross-functional Agile teams to support sprint execution, code reviews, and iterative product releases

PROJECTS

KNOWVA-AI | *Next.js, TypeScript, Node.js, Express, RAG, Qdrant, Redis, BullMQ, Docker, Ollama* [↗](#)

- Built an AI-powered document intelligence platform using RAG architecture with LLM integration and advanced prompt engineering, enabling accurate context-aware querying over large-scale unstructured data
- Engineered vector search with Qdrant, reducing semantic query latency by ~40% and improving information retrieval accuracy
- Built an asynchronous document ingestion pipeline using BullMQ and Redis, improving high-volume processing throughput by ~2x.
- Containerized services with Docker and optimized deployment workflows, ensuring production-ready scalability and environment consistency

TESTIQRA | *React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, Groq API (Llama 3.3-70B), Cloudinary, JWT* [↗](#)

- Architected a full-stack AI-powered testimonial management platform integrating Groq's Llama 3.3-70B LLM across 5 AI features including sentiment analysis and content generation, reducing space setup time by 72%
- Engineered a 4-layer spam prevention pipeline (honeypot, IP/email rate limiting, content filtering), blocking 95%+ bot submissions without third-party dependencies
- Designed secure RESTful APIs with JWT authentication and Google OAuth 2.0, backed by a PostgreSQL schema and Prisma ORM
- Developed an embeddable Wall of Love widget with 4 layouts and 5 themes, enabling seamless third-party website integration via iframe and script snippets

ACHIEVEMENTS

- Ranked **Top 10** among **95+ teams** in AMUHACKS 36-hour hackathon by designing and delivering an innovative real-world software solution under tight deadlines.
- Solved **300+ problems** on **LeetCode**, strengthening analytical thinking, optimization strategies, and coding proficiency.
- Served as **Training & Placement Office (TPO) Coordinator**, leading student-employer communication and supporting campus recruitment operations for 100+ students.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, TypeScript, SQL
- Development:** HTML, CSS, Tailwind CSS, React.js, Next.js, Redux Toolkit, Node.js, Express.js, RESTful APIs
- AI & Data Technologies:** Generative AI, RAG, LLM Integration, Prompt Engineering
- Databases & Tools:** MongoDB, MySQL, PostgreSQL, Prisma ORM, Git, GitHub, Postman
- Core Concepts:** Data Structures & Algorithms, OOP, Computer Networks, System Design, SDLC, Operating Systems, Agile Methodologies
